

## Lifting station Aqualift F Duo Standard, SPF 1500-S3, shut-off valve

## Article information

Item no.: 28659 GTIN: 4026092007723 Price group: 20

## **Advantages**

- Different performance classes available
- Pressure sensor for reliable pneumatic level measurement
- Control unit with self-diagnosis system

## Description

Variant

The lifting station for faecal and faecal-free wastewater is equipped with two submersible pumps and a backflow preventer. The collection tank made of permanently resistant polymer (PE) offers universal connection options and has a screwed access cover.

| variant                                    |   |
|--|---|
| Type of system:                            | duo pump                                    |
| Shut-off valve:                            | Shut-off valve made of polymer              |
| Retaining bracket for the lift protection: | yes   |
| Sound absorption mat:                      | yes   |
| Pump control:                              | Control unit                                |
| Backflow preventer:                        | integrated                                  |
| Pressure pipe connection:                  | horizontal                                  |
|  |   |
| General characteristics                    |   |
| Colour:                                    | black                                       |
| Standard:                                  | EN 12050-1                                  |
| Type of wastewater:                        | with sewage                                 |
| Installation situation:                    | free-standing installation                  |
| Delivery state:                            | Installation-ready (electrical components,  |
|  | connection parts must be connected on site) |
|  |   |
