## **Description**

The pump system for installation in existing collection tanks for wastewater without sewage is equipped with two submersible pumps, a backflow preventer and a manual locking device. The polymer profile (PE) is used to mount and fix the pumping station. Quick-release closures enable easy removal of the pumps. The station is controlled with a float switch by a user-friendly control unit, which is optionally integrated in the building management system via a potential-free contact, or alarm and collective fault messages can be output via a GSM interface.

Variant Type of system: Pump control: Backflow preventer: Pressure pipe connection:	duo pump Control unit integrated horizontal
General characteristics Standard: Type of wastewater: Installation situation: Delivery state: System type:	EN 12050-2 without sewage installation in on-site collecting tank Modular set for assembly on site Duo
Dimensions Net weight: Gross weight: Packaging dimension:	27 kg 27 kg length
